offering by SUEZ

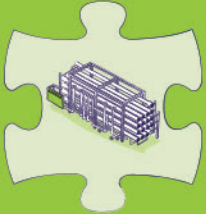

services

conditioning products

SUEZ conditioning services' aqualead® range, offers a wide selection of products to protect and ensure the safety of your facilities.

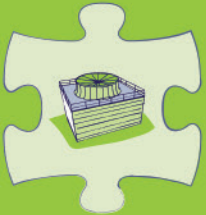

► For your membrane systems:

aqualead® AS: scale and clogging inhibitors

aqualead® CD: cleaning products

aqualead® BC: disinfection additives

► For your cooling systems:

aqualead® AS: scale inhibitors

aqualead® BC: biocides

aqualead® CD: cleaning products

aqualead® CI: corrosion inhibitors

aqualead® MF: multi-functional products

► For your boilers:

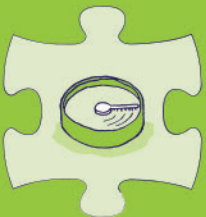

aqualead® AF: boiler anti-priming agents

aqualead® CD: cleaning

aqualead® CI: corrosion inhibitors

aqualead® MF: multi-functional products

aqualead® PO: phosphating agents

► For your wastewater treatment plants:

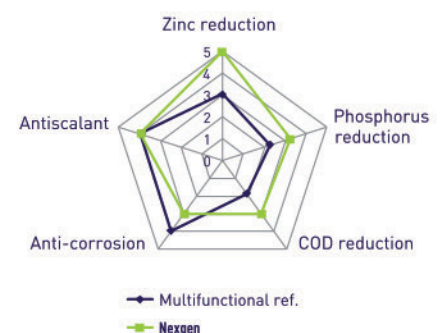

aqualead® AM: anti-foaming agents

aqualead® CO: coagulants

aqualead® FL: flocculants

Discover our new range: aqualead® nexgen

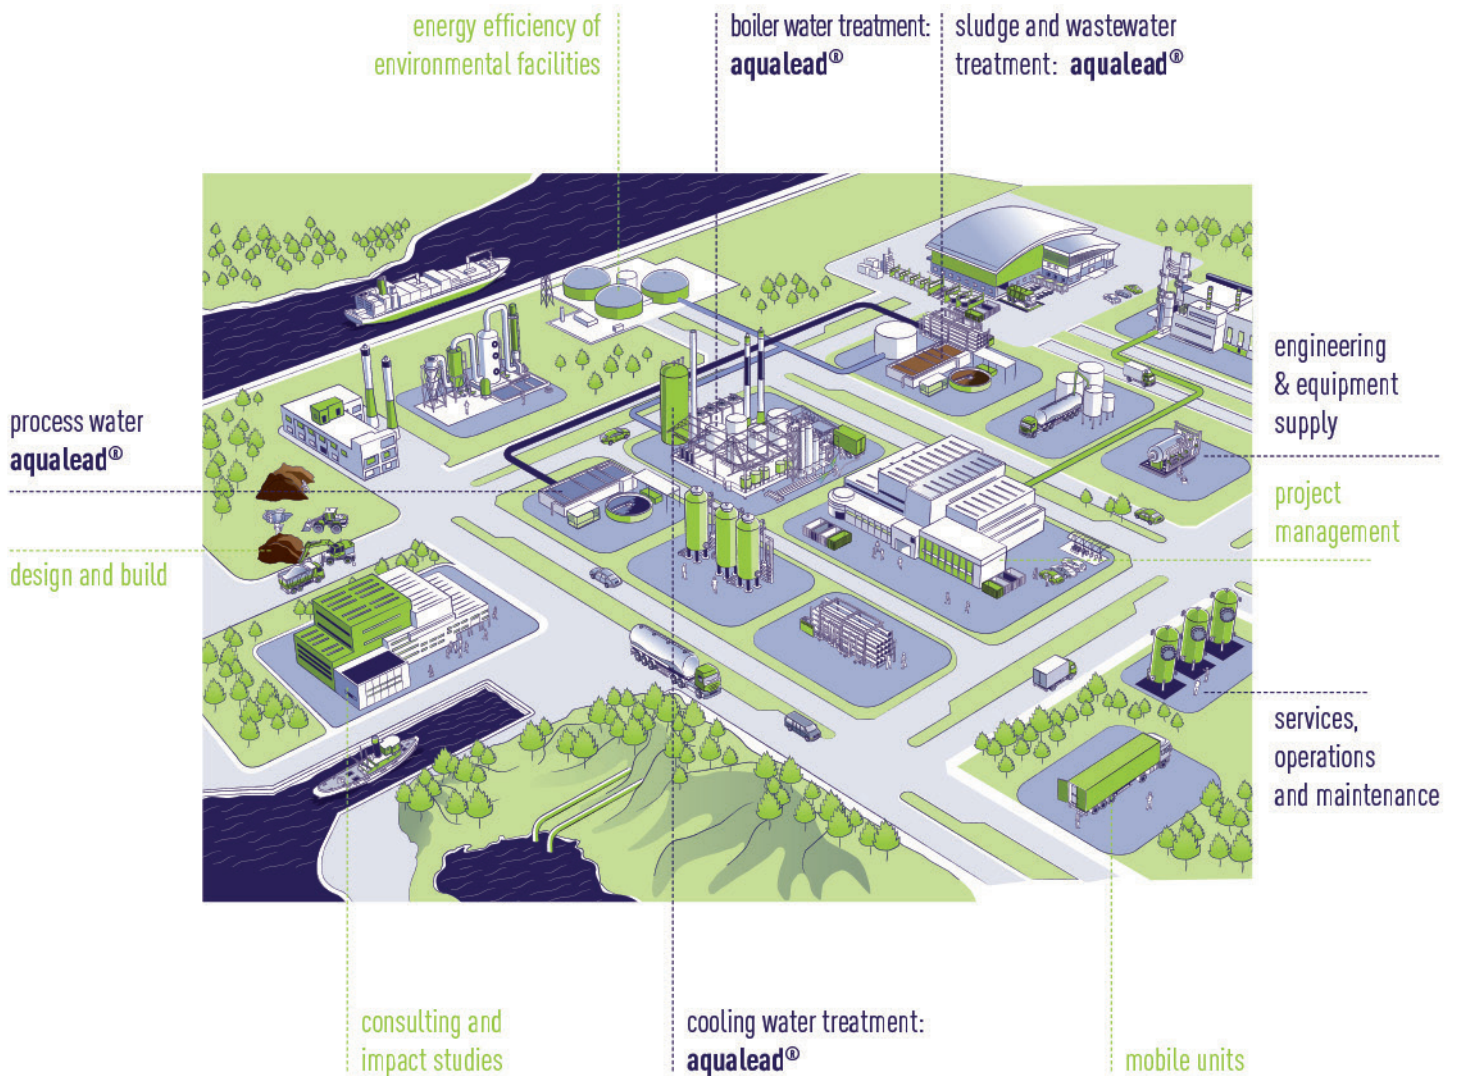

It is composed of corrosion and scale inhibitors with a low environmental impact, which are non-corrosive to guarantee user safety. The products within the range have been designed to respect the environment: they are metal-free, have a low phosphate content and use highly biodegradable polymers.

Water Conditioning Services

A specific offer that is part of the global SUEZ offer

We operate over the entire industrial water cycle and offer a complete range of solutions:

- ▶ engineering and design: audits, development, construction, rehabilitation, implementation
- ▶ services: technical expertise, operation and maintenance of facilities, training
- ▶ interventions, mobile units, off-site effluent treatment
- ▶ supply and installation of equipment
- ▶ water pre-treatment and conditioning solutions and the associated services.

our dedicated teams and services

Whether in the technical or sales department, all of our teams are highly qualified and experienced to assist you in defining the best technical solution for your facilities.

► sales team:

Our teams monitor your facilities on a daily basis through analyses, water and product consumption reports; providing you with recommendations to ensure the efficacy of the treatments put in place. They provide close monitoring and remain your main contact to guarantee a true, long-term partnership.

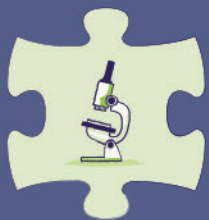

► technical support:

Our technical teams support you in all your requests, and in particular for chemical and microbiological analyses in our laboratory, on-site audits, risk analysis and technical recommendations.

► aqualead® training:

Our training centre runs training modules all over Europe from beginners to experts. Conducted on our premises or directly at your site, our training courses have flexible content to enable the creation of bespoke sessions.

► innovations:

Our innovation division is responsible for developing new technology and new products. To do this, our teams have dedicated pilot units and ensure a constant technological watch to consistently create solutions that meet your needs.

A continuous improvement approach:

We put in place dedicated and specific performance indicators for all facilities. They allow us to optimise operational and maintenance costs:

- reduction of water loss
- quantifiable energy gains
- optimisation of product use.

specific equipment

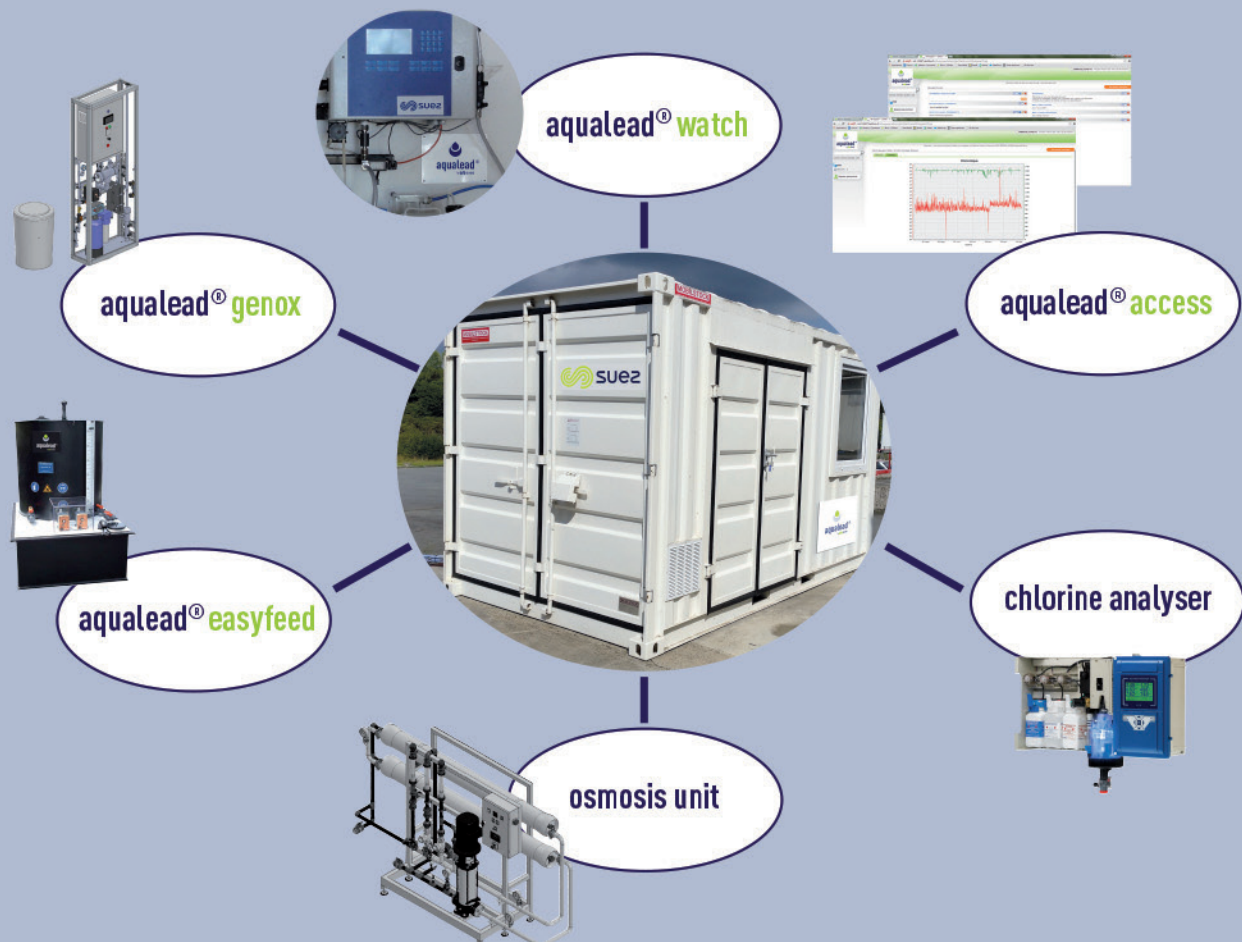

We offer a complete range of equipment to optimise the quality, productivity and performance of your industrial units. The range includes:

- ▶ small dosing and regulation equipment,
- ▶ more complex, bespoke facilities (osmosis unit, softener, filters, etc.),
- ▶ specific equipment.

We have developed a range of dedicated equipment for the use of our products, including: controllers for corrosion prevention or scale prevention treatment of cooling systems and even specially designed storage for the optimal safety of your facilities.

Our specific equipment is marketed under the name **aqualead®**:

- ▶ **aqualead® genox**, for cooling tower treatment without biocides
- ▶ **aqualead® easyfeed**, for safe storage of your products
- ▶ **aqualead® watch**, for optimised monitoring of your cooling systems
- ▶ **aqualead® plug**, for centralised and bespoke management of your facilities
- ▶ **aqualead® access**, for the traceability of your data.
